The Journal of Practice in Clinical Psychology is a clinically peer-reviewed journal that is published quarterly by Department of Clinical Psychology, University of Social Welfare and Rehabilitation Sciences. PCP is dedicated to increase the depth of our knowledge of Clinical Psychology.

The contributions in PCP represent the breadth of clinical psychology erudition in the scientific community featuring original research from diverse fields in clinical psychology including psychometrics and measurement, etiology, epidemiology, prevention, therapy, and rehabilitation in mental disorders.

PCP welcomes the submission of manuscripts that meets the general criteria of significance and scientific excellence, and will publish original articles in basic and applied research as well as the case studies and review articles. We invite you to submit your manuscript(s) through the journal website. Our objective is to inform authors of the decision on their manuscript(s) within four weeks of submission. Following acceptance, a paper will normally be published in the next issue. Guide to authors and other details are available on our website.

PCP is fully committed to the Open Access Initiative and will provide free access to all articles as soon as they are published. We hope you consider Journal of Practice in Clinical Psychology (PCP) for your next submission.

Basic and Clinical Neuroscience is an international multidisciplinary journal that publishes editorials, original full-length research articles, short communications, reviews, methodological papers, commentaries, perspectives and “news and reports” in the broad fields of developmental, molecular, cellular, systems, computational, behavioral, cognitive, and clinical neurosciences. No area in the neural related sciences is excluded from consideration, although priority is given to studies that provide applied insights into the functioning if the nervous system. BCN aims to advance our understanding of organization and function of the nervous system in health and disease, thereby improving the diagnosis and treatment of neural-related disorders.

Manuscripts submitted to BCN should describe novel results generated by experimental that were guided by clearly defined aims or hypotheses. BCN aims to provide serious ties in interdisciplinary communication, accessibility to a broad readership inside Iran and the region and also in all other international academic sites, effective peer review process, and independence from all possible nonscientific interests. BCN also tries to empower national, regional and international collaborative networks in the field of neuroscience in Iran, Middle East, Central Asia and North Africa and to be the voice of the Iranian and regional neuroscience community in the world of neuroscientists. In this way, the journal encourages submission of editorials, review papers, commentaries, methodological notes and perspectives that address this scope.
