

## Basic and Clinical Neuroscience Congress 2012

The scientific study of the nervous system has increased significantly during the recent years. Driven by an ever-expanding base of knowledge, we were encouraged to hold the international Basic and Clinical Neuroscience Congress 2012.

The Basic and Clinical Neuroscience Congress 2012 is organized by Tehran University of Medical Sciences and will take place on November 7-9, 2012 in Razi Convention Center, Tehran, Iran.

BCN congress is a unique event in the region and it will bring together a wide range of neuroscientists to share ideas and give direction to the future. The theme of the congress is “Integrating Basic and clinical Neuroscience toward an Applied Understanding of Neural Systems”. The main topics of the conference include: Genetics and Neuroinformatics, Cellular and Molecular Neuroscience (Neural Excitability, Synapses, and Glia), Cognition and Behavior, Motor Systems, Control and Environmental Interactions, Neuroimmunology and Neuroendocrine Systems, Brain Mapping, Computational Neuroscience, Clinical Neuroscience, Novel Methods and Technology Development and History, Public Awareness, and National and Global Impacts of Neuroscience.

With plenary and special lectures, workshops and symposia, and a wealth of poster communications; on behalf of the organizing committee, we cordially invite you to attend the conference to present your recent work and ideas and share your knowledge in this specific field. While the plenary sessions are important, the majority of the time is devoted to learning from each other. The numerous papers, symposia, workshops, best practices, and poster presentations allow everyone to identify colleagues working on areas of mutual interest.

Deadline for abstracts submission will be 22 July 2012 and the accepted articles will be announced on 5 September 2012.

Register today to take advantage of our early registration discount! For early registration and submitting your abstracts please visit our website at: <http://bcnc.tums.ac.ir/>

We are delighted to host the Basic and Clinical Neuroscience Congress 2012 in Tehran in order to integrate basic and clinical neuroscience toward an applied understanding of neural system.
